

Mohamed Aziz Bahloul

Software engineer

 azizbahloul3@gmail.com  94772560  Mohamed Aziz Bahloul  AzizBahloul  My Portfolio

Profile

Motivated software engineering student with a strong academic background and a passion for learning. Eager to apply theoretical knowledge in practical settings through a dynamic internship role.

Education

Electronique, Electrotechnique et Automatique, ISSAT sousse (2021 -2022)

Software Engineering, Horizon School Of Digital Technologies (2022-2025) 

Professional Experience

Nextunis : "Freelanso" - Freelancing Platform Development, Backend Engineer

- Recommendation engine in Django to match freelancers with jobs and suggest talent to clients
- Developed real-time messaging using Django Channels and WebSockets
- Implemented real-time and email notifications to boost engagement
- Designed a search engine with advanced filters for jobs, users, and talent
- Built a review system to enhance trust through ratings and feedback
- Set up a data warehouse and ETL pipeline for platform analytics
- Added user preferences and subscription-based notifications
- Wrote unit and integration tests to ensure code quality

Mobilite - MindCare AI | Backend Engineer ,

- Developed a Django-based mental health platform connecting users with licensed therapists
- build AI engine analyzing user inputs for mood tracking, intelligent routing, and personalized suggestions
- Used Retrieval-Augmented Generation (RAG) to power a context-aware AI chatbot for mental health support
- Implemented secure session booking and real-time messaging with Django Channels and WebSocket
- Enabled user progress tracking, feedback collection, and session history management
- Added real-time notifications and automated email reminders with user preferences
- Architected scalable backend infrastructure using Django REST Framework, PostgreSQL, Redis, Celery, and Docker
- Developed modular AI analysis for mood, journal, and communication insights
- Automated AI-powered crisis detection and alerting for at-risk users

Skills

Web Development

Node.js, SpringBoot, NextJS, Angular, Django, NextJS, React, Streamlit

AI/ML

CNN , NLP , GenAi: TensorFlow , PyTorch , OpenCV , Scikit-learn, Xgboost , YOLO , Langchain , Dialogflow, TF-IDF

Mobile app development

Flutter , Building ROM Android Open Source Project , Android Native , React Native

Programming Methodology

Agile , KDD , MLOps

Projects

Employee Presence Detection System, Designed and deployed a presence system using Raspberry Pi 4 and ESP32 devices, coupled with a deep learning-based detection model to accurately track employee attendance with 97% precision. 

Chatbot, Developed a chatbot with automatic training and admin functionality using Python, Streamlit, and scikit-learn, handling over 500 daily conversations with a 92% customer satisfaction score. 

PromptToCommand, a Python package that converts natural language into shell commands using AI 

Job Recommendation Application, Implemented a job recommendation system using tf-idf vectorizer and cosine similarity, matching candidates to relevant job listings with a 80% success rate. 

Brain Tumor Detection App, a deep learning application for detecting and classifying brain tumors from MRI scans. The system utilizes state-of-the-art convolutional neural networks to provide accurate classifications across four categories: glioma, meningioma, pituitary tumors, and normal (no tumor) cases. 

Real Time Intrusion Detection System, AI-powered intrusion detection system designed to safeguard Wi-Fi networks by identifying and responding to malicious activities with high accuracy and speed

Certificates

Meta Database Engineer

Foundations of Software Testing and Validation

Meta Advanced React

NVIDIA Fundamentals of Deep Learning

deeplearning.ai

Data Warehouse and Data Integration

Languages

English, French, Arabic
