 AzizBahloul

 My Portfolio

Profile

Motivated software engineering student with a strong academic background and a passion for learning. Eager to apply theoretical knowledge in practical settings through a dynamic internship role.

Education

Electronique, Electrotechnique et Automatique, ISSAT sousse (2021 -2022)

Software Engineering, Horizon School Of Digital Technologies (2022-2025) 

Professional Experience

Nextunis : "Freelanso" - Freelancing Platform Development, Backend Engineer

- Recommendation engine in Django to match freelancers with jobs and suggest talent to clients
- Developed real-time messaging using Django Channels and WebSockets
- Implemented real-time and email notifications to boost engagement
- Designed a search engine with advanced filters for jobs, users, and talent
- Built a review system to enhance trust through ratings and feedback
- Set up a data warehouse and ETL pipeline for platform analytics
- Wrote unit and integration tests to ensure code quality
- build payment app featuring an escrow system, unified wallet management, and integration with Stripe and Konnect payment providers to securely handle client-freelancer transactions and cashouts
- set up Digital Ocean ,integrated its tools and services with the app for hosting, deployment, and scale management

Mobilite - MindCare AI | Backend Engineer ,

- Developed a Django-based mental health platform connecting users with licensed therapists
- build AI engine analyzing user inputs for mood tracking, intelligent routing, and personalized suggestions
- Used Retrieval-Augmented Generation (RAG) to power a context-aware AI chatbot for mental health support
- Implemented secure session booking and real-time messaging with Django Channels and WebSocket
- Enabled user progress tracking, feedback collection, and session history management
- Added real-time notifications and automated email reminders with user preferences
- Architected scalable backend infrastructure using Django REST Framework, PostgreSQL, Redis, Celery, and Docker
- Automated AI-powered crisis detection and alerting for at-risk users

Skills

Web Development – Proficient

Node.js, SpringBoot, NextJS ,Django,React,

Mobile app development

Flutter , AOSP Development, React Native

AI/ML – Expert

CNN , NLP ,GenAi: TensorFlow , PyTorch , Scikit-learn, Xgboost , YOLO , Langchain , Dialogflow, TF-IDF

Programming Methodology

Agile ,CRISP-DM ,MLOps, MVC/MCP

Projects

PromptToCommand, a Python package that converts natural language into shell commands using AI 

Job Recommendation Application, Implemented a job recommendation system using tf-idf vectorizer and cosine similarity, matching candidates to relevant job listings with a 80% success rate. 

Autonomous Cybersecurity Incident Response System, Autonomous Cybersecurity Incident Response System is a autonomous AI platform designed to detect, investigate, and mitigate cyber threats in real-time with zero human intervention. 

AegisScale, AegisScale is an advanced MVP for proactive resource negotiation and scaling in Kubernetes clusters.

Agents forecast loads and negotiate allocationAegisScale is an advanced MVP for proactive resource negotiation and scaling in Kubernetes clusters. Agents forecast loads and negotiate allocations

CrashSense, CrashSense transforms the tedious process of crash log analysis into an intelligent, automated workflow. Designed for servers,CI/CD pipelines, it leverages AI to parse complex logs, explain root causes in plain English, and suggest actionable fixes with safe shell commands.

toxic-chat-detector, A state-of-the-art multilingual toxic content detection system powered by BERT transformers that provides real-time toxicity detection across multiple languages with high accuracy and scalable deployment options. 

face-recognition-raspberry-pie-4-esp32, An advanced IoT-based presence detection and smart lock system combining facial recognition, real-time monitoring, and secure access control for modern workplace solutions 

Certificates

Meta Database Engineer

Foundations of Software Testing and Validation

Meta Advanced React

NVIDIA Fundamentals of Deep Learning

deeplearning.ai

Data Warehouse and Data Integration

Languages

English, French, Arabic
